

Name: Srishti Rawal

Title: TravelNow

Project Summary: A website to help people group up with other travelers. It allows users to search for a place, see who all are interested in traveling to that place and request other users for grouping up. The project would make use of Google Places API for searching for a place and get it's information.

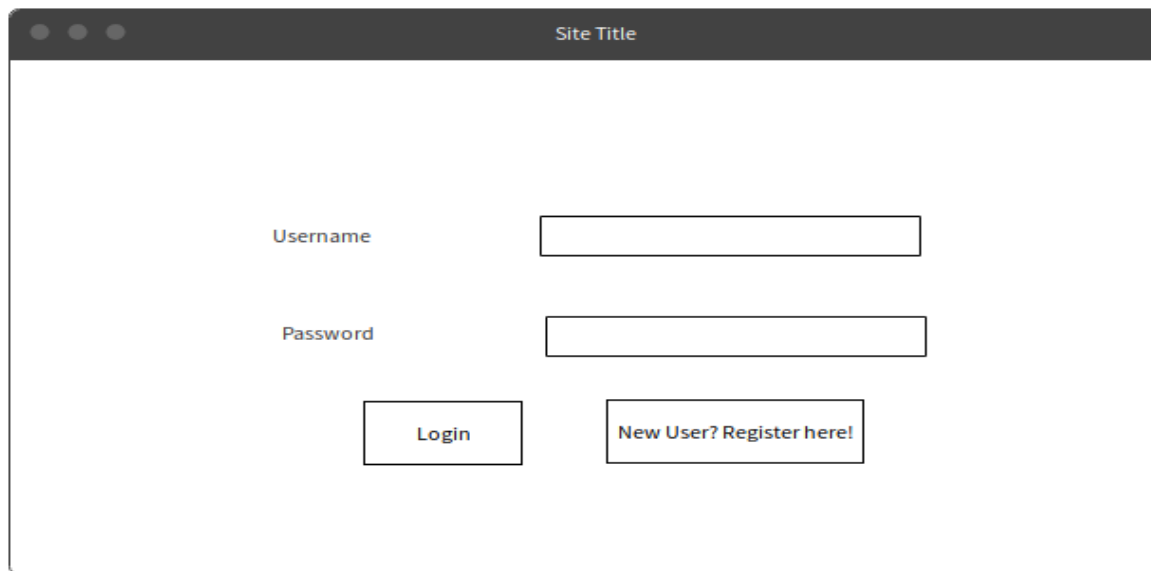

Project Requirements:

Req Id	Description	Responsibilities
UR-1	As a traveler, I should be able to register.	Traveler should be asked for username, password and email.
UR-2	As a traveler, I should be able to login.	Traveler's username and password should be validated.
UR-3	As a traveler, I should be able to search for places	Traveler should be logged in
UR-4	As a traveler, I should be able to mark myself available to group up	Traveler should be unmarked to group up and logged in
UR-5	As a traveler, I should be able to group up with other travelers available	Traveler should be logged in
UR-6	As a traveler, I should be able to plan a trip	Traveler should be logged in
UR-7	As a traveler, I should be able to view travel history	Traveler should be logged in and have traveled to at least 1 place
UR-8	As a traveler, I should be able to update my profile	Traveler should be logged in
UR-9	As a traveler, I should be able to mark a place of interest	Traveler should be logged in and find a place
UR-10	As a traveler, I should be able to add review to a place already visited	Traveler should have visited the place and be logged in
UR-11	As a traveler, I should be able to cancel a trip	Traveler should have a trip being planned and should be logged in
UR-12	As an admin, I should be able to remove a traveler	Admin should have a valid reason and be logged in

UR-14	As an admin, I should be able to view traveler's history	Admin should have traveled and the user must have an history

UI Mockups:

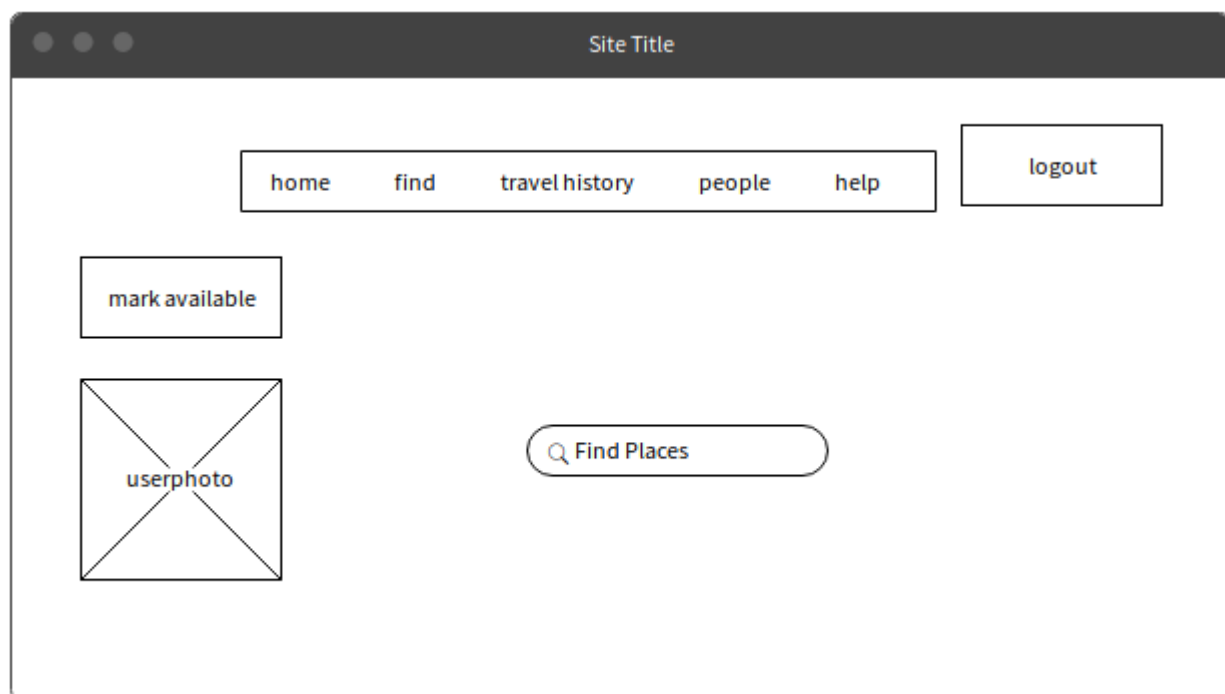

The following screens are a rough estimation of the final screens. They will be changed as required during the course of the project.

1) Login page

A mockup of a login page within a browser window titled "Site Title". The page features a "Username" label followed by a text input field, and a "Password" label followed by a text input field. Below the password field, there is a "Login" button and a "New User? Register here!" button.

2) User home page

A mockup of a user home page within a browser window titled "Site Title". The page includes a navigation bar with links for "home", "find", "travel history", "people", and "help", along with a "logout" button. On the left side, there is a "mark available" button and a placeholder for a "userphoto" (represented by a square with an 'X'). In the center, there is a "Find Places" button with a magnifying glass icon.

3) Place page

Aspen

Interested

Not interested

Aspen, in Colorado's Rocky Mountains, is a ski resort town and year-round destination for outdoor recreation. It's also known for high-end restaurants and boutiques, and landmarks like the Wheeler Opera House, built in 1889 during the area's silver mining boom. The Wheeler-Stallard House is a local history museum set in a 19th-century, Queen Anne-style home, while the Aspen Art Museum displays contemporary artworks.
